1. First, create or sign in a Google account.

2. Create a folder in Google Driver named as 'CS329E_data_analytics' in Google drive and upload the ipynb file
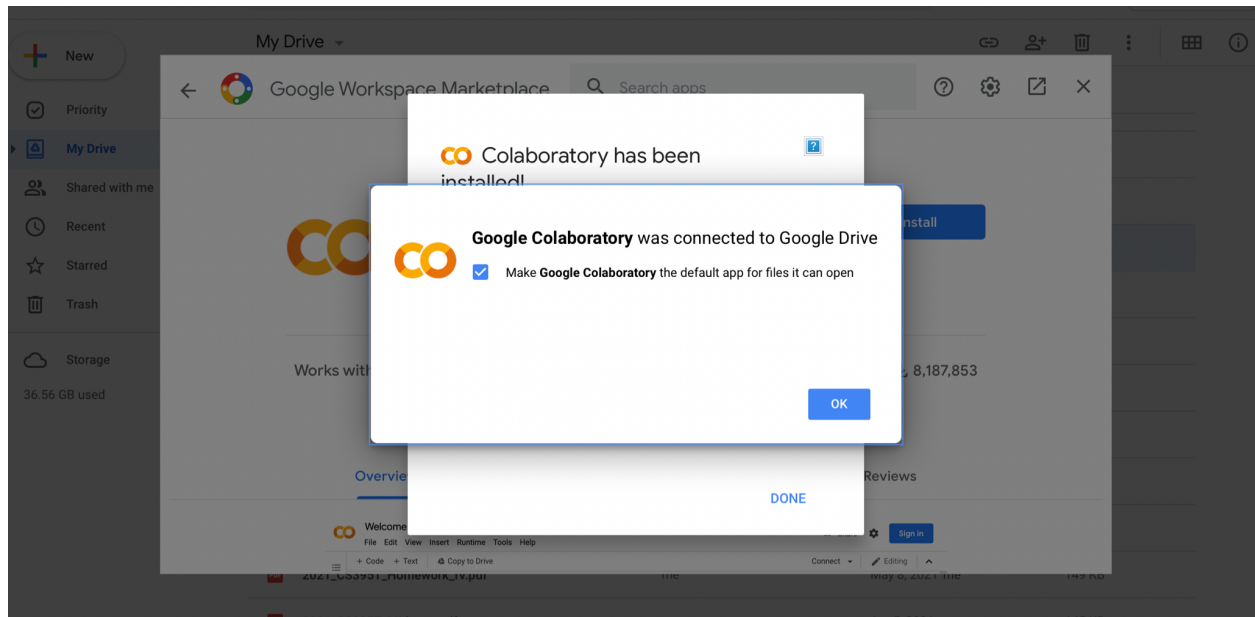

2. Right click the uploaded file, choose '+connect more apps', search for colab and install google colab

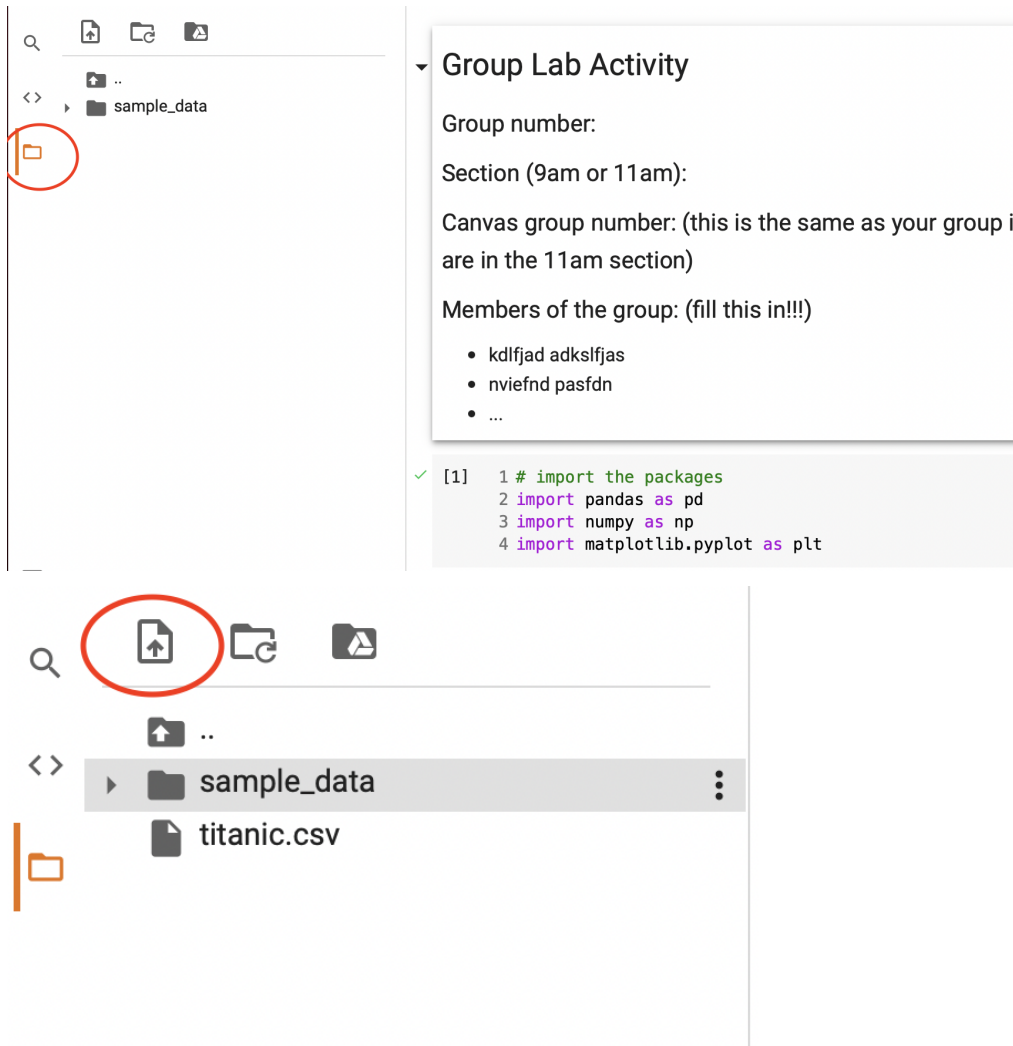

Search 'colab'

3. Right click the uploaded file again , and choose open with 'Google Colaboratory'

4. When the colab page has been open, click the file button on the very left sidebar and upload the 'titanic.csv' from your computer path

5. After you finish the editing assignment, please save your file by 'file--save' or 'file--download'.
6. Exactly ONE person will submit the ipynb file to **Canvas** that has been adjusted with your solutions to the quiz, and your information at the top of the file.
